CONNECT CLIENT. EARN 5%. CREATE EXCEPTIONAL SPACES

SHOWROOM: 1200 MORRIS TPK SHORT HILLS, NJ STUDIO: 125 CLINTON RD FAIRFIELD, NJ WWW.EXODUSAW.COM

A SIMPLE, REWARDING PARTNERSHIP

Introduce a qualified client. We handle every detail from design through installation.

01

REFER

Connect us with a homeowner, developer, architect, designer, contractor, or business seeking custom millwork.

02

WE CREATE

Our in-house team designs, engineers, fabricates, finishes, delivers, and installs the project.

03

YOU EARN

Receive 5% of the qualifying gross sales amount from every contracted project generated by the referred client, subject to the Referral Partnership Agreement.

Ideal referrals: kitchens • closets • vanities • built-ins • wall panels • commercial interiors • custom furniture

Exodus Architectural Woodwork is a full-service custom millwork company specializing in luxury residential and commercial interiors.

With design, digital engineering, fabrication, finishing, delivery, and installation coordinated by one team, clients receive a streamlined experience with greater control over quality, customization, and execution.

TIMING VARIES BY PROJECT SCOPE, APPROVALS, MATERIALS, HARDWARE, FINISHES, AND PRODUCTION SCHEDULE.

TYPICAL LEAD TIME

VIRTUAL DESIGN & FABRICATION (VDF)

Through cutting-edge digital technology, every kitchen, closet, and furniture piece is engineered with absolute precision before it's built. Virtual Design & Fabrication allows us to perfect every dimension and detail in advance, supporting precise execution, efficient production, and custom solutions developed with exceptional accuracy.

When installation is complete, the finished product is a true reflection of the model— every proportion, finish, and material precisely as previewed. The close alignment between the digital rendering and completed project reduces guesswork, improves clarity, and gives clients greater confidence before production begins. Clients step into a space that not only matches their vision but often exceeds it, bringing the approved design to life with precision and craftsmanship.

RENDERING

COMPLETED PROJECT

Exodus Architectural Woodwork builds custom cabinetry combining European frameless construction, precision CNC manufacturing, premium materials, European hardware, professional finishing, and installation in our 5,000 SF Fairfield, NJ, production studio.

1 | CABINET BOXES

TFL / MELAMINE — OUR TYPICAL MATERIAL — We typically use 3/4" TFL panels for cabinet boxes and can use the same TFL material for the doors. This creates a durable, consistent, and coordinated finished product. TFL is available in a wide range of colors, textures, and finishes.

MAPLE PLYWOOD — AVAILABLE OPTION — Maple plywood is available for projects requiring a premium plywood cabinet box, excellent strength, durability, and screw-holding performance.

2 | DOORS & FINISHES

TFL / Melamine doors: Our typical choice for contemporary cabinetry, providing a durable factory-finished surface with many color, texture, and pattern options.

Painted doors: MDF provides a smooth, stable substrate for a high-quality painted finish.

Wood veneer: Premium natural-wood appearance with excellent dimensional stability.

3 | HARDWARE

Premium European hardware, including Blum systems. Options include soft-close hinges, drawer runners, lift mechanisms, pull-outs, specialty storage, and Blum LEGRABOX premium drawer systems.

4 | PRECISION MANUFACTURING

Components are precision-machined on our Morbidelli X50 CNC for accurate dimensions, consistent drilling, clean edges, repeatability, and precise hardware placement.

5 | CLOSETS & SPECIALTY MILLWORK

Custom closets can include drawer banks, hanging sections, shelving, shoe storage, jewelry storage, hampers, pull-outs, LED lighting, glass doors, aluminum-framed doors, and specialty accessories.

6 | FINISHING & QUALITY CONTROL

Painted cabinetry goes through professional surface preparation, sanding, primer, finish coats, and inspection. Every component is checked before delivery and installation.

7 | MADE IN THE USA

Our cabinetry is designed and manufactured in the USA, giving us greater control over customization, precision, quality, and production.

8 | TYPICAL LEAD TIME

Our typical lead time is 4–6 weeks, depending on the project's scope, materials, finishes, hardware, and current production schedule .

CABINET CONSTRUCTION AT A GLANCE

COMPONENT	TYPICAL OPTIONS	BENEFIT
Cabinet Box	3/4" TFL / Melamine Maple Plywood available	TFL is our typical material; durable, stable, coordinated appearance
Doors	TFL / Melamine MDF Painted Wood Veneer	TFL is our typical choice for contemporary cabinetry
